“The Smartest Dash Camera - Marbella KR8S 2 Channel FHD+ FHD Car Blackbox”

Marbella KR8S is the latest and smartest 2 Channel 24 hours recording ready Dashcam debuted by Marbella, our Korean made Dashcam that produces astonishing video quality with its Wide Dynamic Range (WDR).

COMEX 2019 – Marbella, a home-grown brand established in Singapore introduced its latest Korean design and Korea manufactured dashcam with a mission to enhance driving safety and parking security especially during the upcoming festive season.

While retaining all the technological advanced feature found on the current Marbella KR series, the latest **Marbella KR8S** is the smartest 2 channel Full HD 1080P + Full HD 1080P vehicle recorder packed with high quality video imaging Sony Exmor®R CMOS sensor and Wide Dynamic Range (WDR) which enables the camera to capture greater details especially in dark shadows while eliminating highlight blowout or loss of shadow detail in situations of dramatic contrast such as entering or exiting tunnels.

Marbella KR9S is also an exciting launch at COMEX 2019 which offers front and rear recording, 48 hours parking mode compatible and “*Marbella DVR*” app which allow users to share the video footage instantly via WIFI with the utmost ease. Marbella KR9S is the latest dashboard camera that has an LCD display to maximise your visibility on the road.

The sleek design of the latest **Marbella KR6S** makes them virtually undetectable from the outside. A rear-mounted satellite rear camera would not only be more noticeable, but would also elevate the surrounding surveillance for our drivers since the front unit of

<http://www.makagps.com.sg>

Marbella KR6S cover a 140° wide angle recording while capturing a 140° wide solid video footage at rear 24/7.

We are also showcasing **the latest Marbella KR3/KR3S** – a Front (KR3) /Front + Back (KR3S) camera is equipped with the latest and the most innovative Korean technologies that records in Full HD1080p at 140° wide angle in front, and Full HD 1080p 140° wide angle on rear (KR3S), for full coverage and security of your vehicle and loved ones. It has an ability to provide 24 hours' surveillance through gravity sensor (G-Sensor) as well as detecting surround motions (front + rear) to ensure it records every important movement in the surrounding environment of your vehicle. Marbella KR3/KR3S will automatically turn on the Smart Time Lapse mode to ensure a long duration video turn into a full frame video but translate to a shorter duration.

We are also introducing our new members in the all new TX series at COMEX 2019 - The new **Marbella TX2 Mini** with a crystal clear video imaging by featuring the latest Sony iMAX 323 Exmor R® CMOS Sensor. Marbella TX2 Mini is also almost 40% smaller than its predecessor but it produces an astonishing video quality despite its compact and miniature size.

The all new refreshing Marbella TX1 is also another stress free, high quality Full HD1080P Dashcam (DVR) which features a 3 Megapixels (MP) with a 170° wide-angle lens. Debuting at COMEX 2019, the new Marbella TX1 FHD1080P has been upgraded to the latest Sony iMAX 323 Exmor R® CMOS sensor with the latest NTK96658 imaging chipset developed by Novatek. TX1 is a very popular car recorder by the local consumers with its high-quality video quality without a high price tag.

To broaden our marketing channel at COMEX 2019, we will be showcasing our all Marbella/Curve/MaxPower products in COMEX 2019, Suntec Convention Centre – Level 6, Hall 604, Booth 6428 (Presented by Marbella/Curve/MaxPower). COMEX 2019 is open daily between 12pm – 9pm.

The Smartest Dash Camera - Marbella KR8S

Marbella KR6S – 50% Smaller and 50% more affordable

The sleek design of the latest **Marbella KR6S** makes them virtually undetectable from outside. A rear-mounted satellite rear camera would not only be more noticeable, but it would also elevate the surrounding surveillance for our drivers since the front unit of Marbella KR6S cover a 140° wide angle recording while capturing a 140° wide solid video footage at rear 24/7.

Marbella KR6S is designed to provide you with an extra level of protection and unlike typical front and rear camera in the market, the Marbella KR6S is almost 50% smaller than any other dashcam and it is invisible yet delivering an astonishing video quality throughout day and night by equipping the latest Sony Exmor R® iMAX 323 CMOS imaging sensor as compare to Marbella KR5 and KR6S also marked our 3rd dual channel dashcam from Korea.

Marbella KR6S is our very first vehicle recorder without a LCD panel but users has a full access to the 2 channel camera by downloading the App either from Google Playstore or Apple iOS store to preview, download, playback and share your video footages on social media platform. You can also customised your preferred configurations through our own APP. The Marbella KR6S will be broadcasting a steady WIFI signal even you are in a remote area so our users will not required any WIFI signals even on the road.

Marbella KR6S is connected with a tiny-sized set-top box which is also virtually undetectable from the outside. The tiny-sized set-top box operates with thermal protection system whereas the Marbella KR6S/KR6 will automatically stop operation when temperature reach above 70°C/158°F or an environment below -20°C/-68°F. This will prevent the Marbella KR6S over-exposed to the extreme weather condition especially after a long parking hours under a heating hot sun in Singapore or capturing an extreme

scenic journey when you take them aboard to Alaska.

The sturdy set top box is also created with a mission to prevent direct sunlight on the MicroSD card so the unit could operate in a comfortable environment. Users are no longer required to replace their faulty MicroSD card due to the heat and this will also minimise the possibility of file corruption and data loss. Its self-explanatory set-top box uses a very high quality BMW™ connectors and 3 pin Molex Power Cable interface makes the installation easy and allows users to place the set top box anywhere they preferred in their vehicle. This innovative design coupled with 2 ultra light weight front and back camera, provides a new revolutionary design in the automotive industry.

Flash memory inherently has a limited number of write/erase cycles and there several reasons to cause voltage levels shift, eventually causing read or write failure and therefore Marbella KR6S is recording high quality video footage in *.TAT format which means it reduces the damages caused during long hour recording. Format FREE is the latest and the most effective memory management without having a trouble to format your MicroSD card by changing from conventional time division method (fixed file size - *.FAT Format) to Space division method (efficient using the SD card capacity) of memory, avoid memory fragmentation in advance that extend the life of the memory card.

Marbella KR6S supports 24 hours recording and park monitoring sensor has been embedded in the BOTH front and back camera. Marbella KR6S do not required to install any voltage cut off device since it has a built-in battery discharge voltage monitoring function. Usually the consuming current of Dash Cam is 10 ~ 50mA and Marbella KR6S has one of the lowest consuming current consumption of 250mAh - Front FHD + FHD (1/10 of a similar products), it realize battery discharge free.

Marbella KR6S has also its own voltage cut-off function without installing any power safety device to prevent battery discharge overnight and it provides 3-wire power cable as part of

the standard accessories to ease your installation.

The optional GPS logger which captures your GPS data such as location and speed will provide users a more accurate evidence on your driving. The XYZ axes on the dedicated PC viewer and more accurate understanding of the situation is available such as checking driving information with the support of Goggle map and speed information when the GPS dongle is connected to the set top box on your Marbella KR6S.

Marbella KR6S – 2 Channel Dashcam FHD 1080P + FHD 1080P

Front & Back Camera

Marbella KR9S - A 2 Channel Dashcam that is simply perfect for your needs.

Marbella KR9S is the latest parking mode recording dashcam introduced by Marbella in 2019 and it capture astonishing video quality and pack with innovative features.

The most modernised, exquisite and tastefully design – Marbella KR9S is born with the intelligent built-in WIFI function allows you to preview, download, playback and share your video footages on various social media platform. There are more than 25 configuration settings to customised your preferred configurations through our “*Marbella DVR*” APP available on both iOS and Android Playstore.

Marbella KR9S is equipped with the latest and the most innovative Korean designed dash cam which records in Full HD1080p at 140° wide angle in front, and FHD 1080p 140° wide angle on rear, for full coverage and security of your vehicle and loved ones. With its sensitive improved 3.5inch Touch Screen with the TFT panel, Marbella KR9S gives you an easy access to our new comprehensive settings from WIFI settings to battery protection settings at your fingertips.

Marbella KR9S will automatically stop operation when temperature reach above 70°C/158°F or an environment below -20°C/-68°F. This will prevent the Marbella KR9S over-exposed to the extreme weather condition especially after a long parking hours in scorching weather condition in Singapore or in an extreme cold winter country aboard.

Extract the latest imaging sensor from our recent model - Marbella KR8S, Marbella KR9S is also packed with Sony Exmor®R CMOS imaging sensor and Wide Dynamic Range (WDR) which enables the camera to capture greater details especially in dark shadows while eliminating highlight blowout or loss of shadow detail in situations of dramatic contrast such as entering or exiting tunnels.

With its special licensed technology, the Marbella KR9S is a format Free Dashcam which

allows the Marbella KR9S to record high quality video footage in *.TAT format which means it reduces the damages caused during long hour recording. Format FREE is the latest and the most effective memory management without having a trouble to format your MicroSD card by changing from conventional time division method (fixed file size - *.FAT Format) to Space division method (efficient using the SD card capacity) of memory, avoid memory fragmentation in advance that extend the life of the memory card.

Marbella KR9S supports parking surveillance mode up to 48 hours without a need to connect to any external power source. Marbella KR9S do not required any voltage cut off device since it has a built-in battery voltage monitoring function and when the Marbella KR9S is connected to your vehicle, the 3.5inch touch screen monitor will display your battery voltage so you could constantly monitor the condition of your car battery and determine when your car battery replacement become a need.

Marbella KR9S has a dual voltage cut-off function without installing any power safety device to prevent battery discharge overnight and it provides 3-wire power cable as part of the standard accessories. It will either cut off any further power consumption from your car when it detects a low battery from your vehicle or it will stop the recording when it exceeded 48 hours under parking surveillance mode.

It also supports external GPS which captures your GPS coordinates and speed to provide the most accurate evidence on your driving. The XYZ axes on the dedicated PC viewer and more accurate understanding of the situation is available such as checking driving information with the support of Goggle map and speed information when the GPS dongle is connected to your Marbella KR9S.

Marbella TX2Mini

The Marbella TX2Mini is a high-grade Dashcam enabling front vehicle recording in Super HD 1296P quality. It is equipped with state-of-the-art technology, among them, 170 degree wide angle lens with 3MP lens and WIFI connectivity. User experience and design as well as placing value on details were key factors in the development of the dashcam. The sleek and compact design reflects invisibly on the windscreen with carefully designed components such as the compact metal housing with the detachable 3M mounting clip.

Marbella TX2Mini uses Sony iMAX 323 Exmor R® CMOS sensor with a 170° degree ultra-wide horizontal wide angle lens. With it's Wide Dynamic Range (WDR) digital imaging processing technology will make the night recording sharper and even more outstanding than its predecessor.

Go to your Google Playstore or Apple iOS Store to download the latest APP since the Marbella TX2Mini is our very first cylinder design without any LCD display but users will be able to view its live recording and download all the video footages from the MicroSD card through it's 2.4GHz WIFI broadcasting function.

Marbella TX2Mini is an ultra light weight device and it will be secure in all weather conditions with its almost invisible 3M windshield adhesive which also reduces vibrations and removes without leaving residue behind.

Another neat feature found on Marbella TX2 Mini is the remote event button in case of any event or incident you wish Marbella TX2 Mini to pay more attention when you are on the road.

It will perform as an emergency recording using the remote event button even without any impact or accident incurred to you or your car. This will add an extra security and give you an extra peace of mind when you are on the road!

Marbella TX2Mini

Marbella TX1

Thanks again to our R&D team, the new refreshing Marbella TX1 is the latest debut in COMEX 2019 featuring a crisp and clear Full HD 1080P video quality. Just like its predecessor – Marbella LX1, Marbella TX1 has all the essentials to deliver great value and great video quality.

Marbella TX1 is born with a vision to provide an evidence in any lighting condition. The camera uses the latest Sony iMAX 323 Exmor R® CMOS sensor with the latest NTK96658 imaging chipset developed by Novatek featuring a wide recording angle of 170° which will allow drivers to capture much more scenes than most of other dash camera in the market.

To enhance driver's visibility, Marbella TX1 has a display through a 3.0" (16:9) LCD monitor and 5 functional buttons at the bottom of device, it makes your Dashcam (DVR) a lot easier to control and navigate while driving.

Marbella TX1 uses the latest engineered 3M tape mount to ensure the Marbella TX1 will be hold security and sturdy on your windscreen. 3M windshield adhesive is very secure, reduces vibrations and removes without leaving residue behind.

Marbella TX1 produces astonishing FHD 1080P video quality with its 3.0 Mega Pixel video lens and just like other TX Series produced by Marbella, Marbella TX1 has an in-built with G-Sensor and that means it can detect activities of any impact and Marbella TX1 will save the files and locked the files automatically hence the important file will not be overwritten when your memory card is full.

Marbella TX1 will also continue to record video without any interruption by overwriting the earliest files when the card has been filled.
